Ultra Link Software Features

Make your own reports: Information can be exported to your spreadsheet program to allow you to build customized reports for your company's individual needs.

Hard copy print outs: Print hard copies containing all the information contained in the vehicle ECU at the time it was stored. These hard copies can be shared with customers or used as file records.

Organizes your work: The Ultra-Link allows for the alpha-numeric input of a unit number or job number to allow for easy information organization.
